

Are you a practicing pediatrician in Macomb, Barry, Berrien, Branch, Calhoun, Cass, Kalamazoo, St. Joseph, or Van Buren counties?

Do you need Continuing Medical Education credits, MOC Part IV or both?

This spring, the MIAAP is beginning another round of trainings, **SCREEN for 3**, *Improving early interventions for developmental, behavioral and mental health*. This training will be provided free of cost, will offer 20 CME credits from Wayne State University College of Medicine and is approved by the ABP as a MOC Part IV project. In addition to the training, you will receive the ASQ-3, ASQ:SE toolkits (valued over \$600) and a **Screen for 3** practice resource manual.

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education through the joint providership of Wayne State University School of Medicine and Michigan Chapter of the American Academy of Pediatrics. The Wayne State University School of Medicine is accredited by the ACCME to provide continuing medical education for physicians.

Wayne State University College of Medicine designates this live activity for a maximum of **20 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Project Summary

Implementing developmental and behavioral screening into a primary care practice can significantly improve the early identification of potential developmental, behavioral or social emotional delay for many children. In addition, children and families can be linked to appropriate community resources in a more timely and responsive manner.

Incorporating developmental and behavioral screening requires the participation of the entire practice, since it needs to become a coordinated, efficient process to ensure all children receive the appropriate screening at the appropriate time. Our project ensures that implementation is supported and successful for the entire practice.

If you are interested in additional details and requirements for participation in the trainings this year, please contact:
Colleen Livingston, MIAAP Program
Director, colleen.livingston@miaap.org or

American Academy
of Pediatrics

DEDICATED TO THE HEALTH OF ALL CHILDREN™

Michigan Chapter

Target Audience: Pediatricians, Family practice physicians, and their staff

At the end of participation in this activity, the learner will be able to:

1. Learn how to utilize developmental and behavioral screening tools to identify children and youth with developmental and mental health needs.
2. Utilizing evidence-based research and return on investment research, to describe the benefits of early referrals.
3. Describe and understand the pediatrician's role in referring children and youth for further assessment and treatment.
4. Describe and understand community-based referral services and how to refer and track the progress of patients.
5. Understand how to bill for developmental or behavioral screening.
6. Receive a resource list of community referral organizations, including Early On, Great Start Collaborative, Head Start, Community Mental Health and Special Education.
7. Describe the benefits, process, and methods for engaging in partnership between providers, community referral agencies and parents.
8. Describe how this activity can become an MOC activity for individual physicians.

Planning Committee:

Teresa Holtrop, MD, FAAP – Activity Director
Colleen Livingston – Program Director, MIAAP
Denise Sloan – Executive Director, MIAAP
